To Whom It May Concern,

I had the pleasure of managing Devante Williams during his time as an Operations Engineer at GLG from 06/28/2021 to 10/03/2025. From day one, he brought strong technical ability, curiosity, and a great attitude that made a real difference on our team.

Devante worked on many of the systems we use for monitoring a remediation and quickly became one of the engineers we could rely on to get things done. He took ownership of challenging projects, wrote clean and maintainable code, and was always proactive about suggesting improvements or catching potential issues early.

One example that stands out is his implementation of monitoring around the cron jobs we have running throughout our company, before he implemented this we had no way of knowing when/if jobs ran on time unless business stakeholders approached us. After he implemented the solution we were very much capable of monitoring and intervening on jobs that were locked or stuck before they became a production issue.

Beyond the code, Devante was just great to work with. He is collaborative, thoughtful, and dependable. He communicated well across teams, was open to feedback, and regularly stepped up to help others debug or pair on tricky issues.

I'd happily work with Devante again in the future. He brings the right mix of technical skill, accountability, and team spirit that every engineering team needs.

If you'd like to talk more about Devante's work or impact, feel free to reach out to me. [Contact info available upon request]

Best,

Sayeeef Bazli
